Quarterly Report

31 March 2025

Economic review

Australia: Australian budget 2025-26 sees a return to fiscal deficit

- The Australian Federal Budget released in March included cost of living measures and healthcare funding. After consecutive surpluses, this year's Budget returns to a deficit, but projected debt levels remain low compared to other developed economies.
- Decreasing inflation allowed the Reserve Bank of Australia (RBA) to reduce the cash rate by 0.25% to 4.10% in February, the first rate cut since 2020. However, the RBA cautioned against expecting further cuts due to tight labour market conditions, limited labour supply and stagnant productivity growth. Australian Q4'24 CPI was 2.4% Year on Year (YoY).
- Australian GDP for Q4'24 rose to 0.6% Quarter on Quarter (QoQ) up from 0.3%, due to stronger than expected household consumption. This is in line with market expectations and exceeds the RBA's forecast of 0.5%.
- The Australian unemployment rate remained steady rising only +0.1% over Q1'25 to end the quarter at 4.1%. The RBA will likely look for evidence of a weakening labour market before cutting rates again.

International: German parliament passes defensive infrastructure spending bill

- Since the Trump Zelenskyy meeting in February, European leaders have been prompted to increase
 fiscal spending, especially on defence. The German parliament passed a bill to exclude defence
 spending from the debt limit and increase infrastructure spending by 500 billion Euro. This is a huge
 shift for Europe, especially for Germany which has historically been conservative in its fiscal policy.
- President Trump imposed tariffs on the US's 3 largest trading partners: Canada, Mexico and China, expanding tariffs over the quarter to include steel, aluminium and automobile parts. In early April, he announced reciprocal tariffs to match the import duties placed on US goods and services by other nations.
- The US Federal Reserve (Fed) left interest rates range unchanged at 4.25-4.5% for the quarter.
 Following the latest Fed meeting, Governor Powell noted that while short-term consumer inflation
 expectations had risen due to tariffs and uncertainty, he didn't see any long-term shift in
 expectations based on market-based measures. The US unemployment rate remains steady at
 4.1% over the quarter.

Market review

Share markets were down in the March quarter

- International shares saw negative returns in Q1'25, down -2.6% as US tariffs concerns rattled investor confidence. US Technology shares fell significantly as the Magnificent 7 shares (Alphabet, Amazon, Apple, Meta Platforms, Microsoft, NVIDIA, and Tesla) underperformed the broader market. Chinese Al company DeepSeek shocked markets with its Al having been trained on lower cost hardware and with lower energy use than comparable US-based Als.
- Australian shares underperformed global share markets, down by -2.9%. The technology sector was the largest detractor from performance, followed by healthcare.
- International REITs (real estate investment trust) were up 0.9% in the quarter on the back of the fall in global bond yields. Australian REITs were down -6.6%, due to capital raising in the REIT sector.

Fixed income markets were up during the quarter

- International sovereign bonds were up 0.7% in Q1'25. US 10-year government bond yields were down over the quarter, falling 40bps. Government bonds in the EU experienced a significant rise in yields over the quarter, especially after the announcement of Germany's new fiscal spending package.
- Australian sovereign bonds were up 1.2%, as Australian bond yields were largely flat.
- Credit spreads widened over the quarter as investor sentiment deteriorated due to ongoing trade rhetoric. However, falling international yields resulted in a 1.5% return for international credit.

Australian Dollar experienced fluctuations against major currencies

• The Australian dollar was marginally higher in Q1'25 against the US dollar, but it fell significantly against the British Pound and the Euro following the announcement of the German fiscal spending package.

¹ Benchmarks index values are published with a lag. Where these values are yet to be published, the previous benchmark index value is assumed, with the value updated once available.

Important notes

Only Mercer Super Trust (MST) investment options that were invested in at the end of the quarter are reported on (and in the case of the Mercer SmartPath® investment options only the 'Paths').

Total returns are based on exit prices as at the quarter end. Total returns are shown after allowing for the deduction of taxes and investment fees. Returns greater than one year are shown on an annualised basis.

Performance (after investment fees and taxes) may be provisional depending on information available at the time of publication and may be subject to adjustment.

Returns throughout this report may be subject to rounding.

The objective time horizons used in the investment objectives for some investment options are:

- Short term Less than three years
- Medium term Three to seven years
- Long term Greater than seven years

The term 'benchmark' is used in the investment objective of some investment options and refers to an asset class performance benchmark. Refer to the 'Mercer Sector Asset class benchmarks' section of this report for the relevant asset class performance benchmarks for the Mercer Sector and Mercer Passive investment options.

This report has been prepared by Mercer Investments (Australia) Limited (MIAL) ABN 66 008 612 397, Australian Financial Services Licence 244385 on behalf of Mercer Superannuation (Australia) Limited (MSAL) ABN 79 004 717 533, Australian Financial Services Licence 235906 trustee of the Mercer Super Trust ABN 19 905 422 981. MSAL has appointed MIAL as an investment consultant to provide investment strategy advice, portfolio management and implementation services including investment manager selection and monitoring. MIAL is also the responsible entity of a number of investment funds (the Mercer Funds). Mercer Super Trust invests in the Mercer Funds.

'Mercer' and 'Mercer SmartPath®' are Australian registered trademarks of Mercer (Australia) Pty Ltd (Mercer) ABN 32 005 315 917.

This information is based on information received in good faith from sources we believe to be reliable and accurate. Any reference to legislation reflects our understanding of the legislation and is not a substitute for legal advice.

Before making any decision concerning the impact and application of laws to your circumstances, we recommend you obtain your own legal or other appropriate professional advice. No warranty as to the accuracy or completeness of this information is given and no responsibility is accepted by Mercer or any of its related entities for any loss or damage arising from any reliance on the information.

Past performance is not a reliable indicator of future performance. The value of an investment in the Mercer Super Trust may rise and fall from time to time. The investment performance, earnings or return of capital invested are not guaranteed.

Any advice provided is of a general nature and does not take into account your objectives, financial situation or needs. Before acting on any advice we recommend you obtain your own financial advice and consider the Product Disclosure Statement and Financial Services Guide available at <a href="market-needed-

The investment returns shown for the Mercer Super Trust investment options throughout this Investment Report do not take into account the unique characteristics applied to each investor (such as timing of cash flow). As a result, the actual investment returns applying to a particular investor may differ from the returns shown in this Investment Report. You should also remember that past performance is not a reliable indicator of future performance.
