Economy and markets

Economic overview

Data released over the quarter was broadly indicative of slowing in economic conditions. Retail sales growth has remained weak, whilst some business surveys are indicating an easing in conditions, particularly in the consumer-facing retail and recreational service sectors. The labour market has however remained strong, although there have been some signs of easing with job vacancies continuing to reduce. Inflation grabbed the most attention over the quarter with the headline Monthly CPI Indicator for May rising to 4.0% Year-on-Year (YoY), with food, alcohol & tobacco, housing and petrol among the key drivers. Core measures of inflation remained elevated although broadly unchanged. The inflation readings nevertheless caught the attention of the Reserve Bank of Australia (RBA). Whilst the RBA kept interest rates unchanged during the quarter, it pledged to remain “vigilant to upside risks to inflation”.

With disinflation in the US showing signs of slowing in the first quarter, all eyes were on US inflation data in the second quarter. Concerns around inflation increased earlier in the quarter, with some inflation readings recording a rise in their YoY pace. This inflation impulse, however subsided, with subsequent readings declining, easing concerns about its trajectory. In contrast, disinflation in the Eurozone showed signs of slowing during the quarter, with services inflation remaining elevated. From a growth perspective, data released over the quarter broadly indicated growth slowing internationally. The US consumer has shown signs of slowing with retail sales weakening, notably among housing-related categories such as furniture, whilst on the production side, the services sector in the US has continued to show resilience. In the Eurozone, business activity broadly improved over the quarter, led by the services sector, whilst the consumer also appears to be finding some strength, with retail sales no longer contracting. We are seeing a comfort to cut interest rates amongst other developed market central banks in the June quarter with the Eurozone, Switzerland, Sweden, Denmark and Canada all cutting rates by 0.25%. Meanwhile, the US Federal Reserve kept interest rates unchanged during the quarter, noting that the recent inflation readings have been “good” citing the need for further evidence of disinflation to cut interest rates.

In China, economic conditions have remained lacklustre, with its property sector remaining a drag on both economic activity and consumer sentiment. Exports have been a source of strength recently, although this may partially be attributed to orders being brought forward ahead of potential tariffs that the Trump administration (if re-elected) may impose in the future. In response, Vice Premier He Lifeng called for more forceful measures to deliver pre-sold homes and to address the inventory of unsold homes. The Peoples' Bank of China in turn announced a CNY300 billion lending program to help buy already-built but unsold apartments and cut the minimum deposit for both first and second-home purchases. In Japan, there have been more positive signs with consumer confidence rebounding in response to wage growth beginning to catch up with inflation. Business conditions have also improved, led by the services sector. The Bank of Japan's (BoJ) monetary policy left interest rates unchanged during the quarter noting it would scale back purchases of Japanese Government Bonds, with details to be announced in July.

Market review

The Australian equity market ultimately ended the quarter lower. The market declined in April and May influenced by global market developments but did not recover as much as international equity markets, partially due to its lower weight to the technology sector. Australian government bond yields ended the quarter higher following the stronger-than-expected local inflation data. Whilst the Australian dollar (AUD) ended the quarter higher against most major currencies, notably the Japanese Yen, with markets disappointed by the BoJ's decision to leave interest rates unchanged earlier in the quarter.

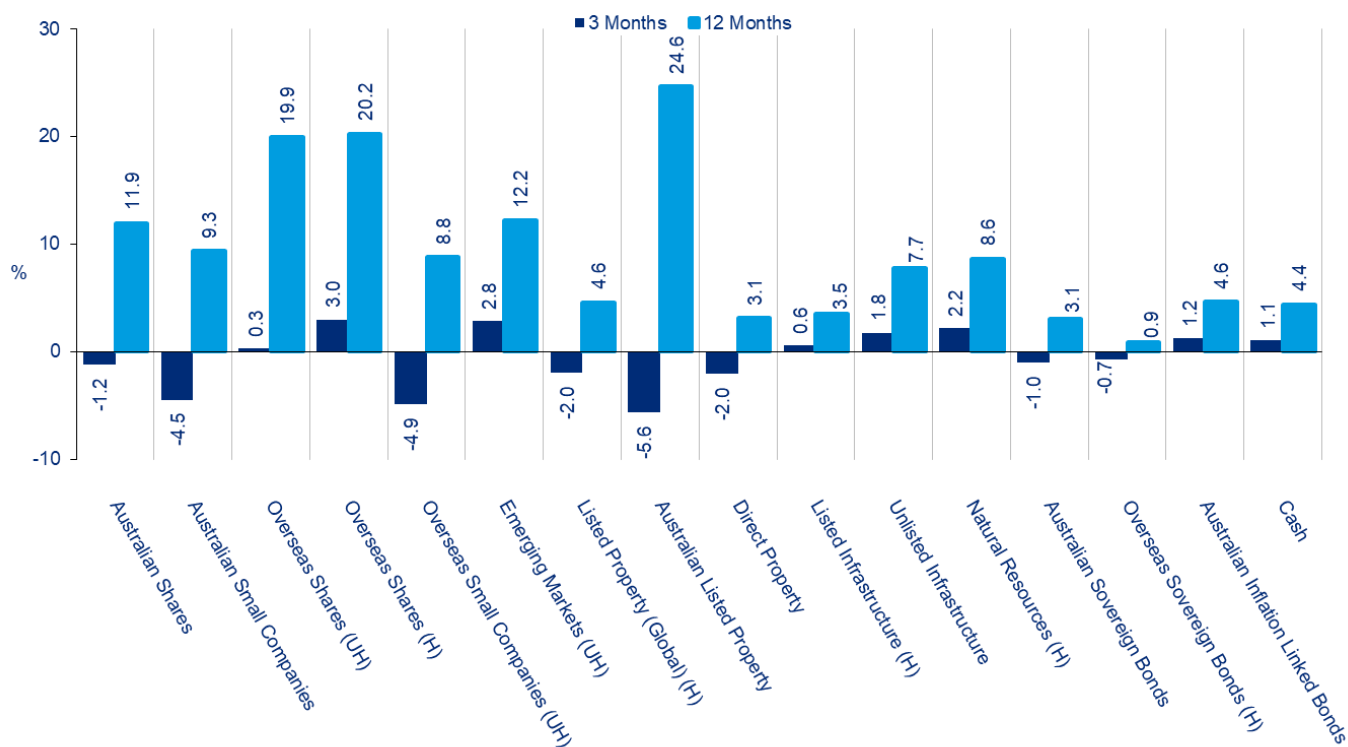

International equity markets delivered a positive return for the June quarter. Markets initially declined earlier in the quarter, with rising inflationary and interest rates concerns in the US, before recovering in response to lower inflation readings.

Meanwhile, international government bond yields rose earlier in the quarter, following the stronger US inflation reading, but failed to retrace despite the subsequent softer inflation readings, recording a negative return for the quarter.

Past performance is not a reliable indicator of future performance.

Financial market returns to 30 June 2024

This chart shows the financial market returns for various asset classes using the relevant asset class benchmark listed in the table below.

NOTES:

Chart constituents

- Currency: AUD.
- UH: Unhedged.
- H: Hedged.
- Net Index: Total Return (Net Dividends Reinvested).
- Total Return: Total Return Index with Gross Dividends.
- Where a lag exists, the performance period start and end dates are shifted accordingly.
- The asset class benchmarks used in this chart are not intended to align with the benchmarks used by the Mercer Super Trust.

Asset Class	Benchmark	Data Type
Australian Shares	S&P/ASX 300 Accumulation Index	Total Return

Important notes about this report

- **Past performance is not a reliable indicator of future performance.**
- Only Mercer Super Trust (MST) investment options that were invested in at the end of the quarter are reported on (and in the case of the Mercer SmartPath investment options only the 'Paths').
- **Total returns** are based on exit prices as at the quarter end. Total returns are shown after allowing for the deduction of taxes and investment fees. Returns greater than one year are shown on an annualised basis.
- The asset allocation table for each investment option listed in this report discloses an asset allocation benchmark (b'mark). The asset allocation benchmark falls within the asset allocation ranges disclosed in the relevant PDS.
- Performance (after investment fees and taxes) may be provisional depending on information available at the time of publication and may be subject to adjustment.
- Returns throughout this report may be subject to rounding.
- Foreign currency exposure under key statistics includes unhedged allocation to International Shares Large Cap, Global Low Volatility Shares, Global Small Companies, Emerging Markets Shares, Emerging Markets Debt, Private Equity and Sustainable Opportunities.
- The objective time horizons used in the investment objectives for some investment options are:
 - Short term – Less than three years
 - Medium term – Three to seven years
 - Long term – Greater than seven years
- The term 'benchmark' is used in the investment objective of some investment options and refers to an asset class performance benchmark. Refer to the 'Mercer Sector Asset class benchmarks' section of this report for the relevant asset class performance benchmarks for the Mercer Sector investment options.

Mercer Sector Asset class benchmarks

Refer to this table for the current asset class benchmarks used for the Mercer Sector investment options. Historical benchmark series may be composite benchmark performance which will capture historical benchmark changes. Alternate benchmarks may apply to underlying investment managers.

Mercer Sector investment option	Applicable Benchmarks
Mercer Australian Shares	S&P/ASX 300 Accumulation Index
Mercer International Shares	MSCI World Index (ex Australia) in A\$ (Unhedged) with net dividends reinvested
Mercer International Shares – Hedged	MSCI World Index (ex Australia) in A\$ (Hedged) with net dividends reinvested
