

Mercer Super Trust

Monthly report

Corporate Superannuation Division

June 2023

Financial markets update

In June, global equities, commodities and REITs posted strong returns, while bonds were generally flat with credit outperforming government bonds.

Markets continue to price in a soft landing as news flow remains focused on falling headline inflation, a potential end to the global interest rate hiking cycle and broad economic resilience, despite challenges for some sectors, such as regional banks.

Inflation continues to edge down in most major economies raising hopes that the hiking cycle is near an end in most regions. Although the Federal Reserve kept rates on hold for the first time in over a year, forward guidance was more hawkish than expected, which weakened the positive momentum that markets carried during the first half of the month. The ECB and RBA hiked rates by 25bps each, while the Bank of England was compelled to hike by 50bps, given stubbornly elevated levels of inflation in the UK. China continued to ease as its expected economic recovery has been underwhelming. Labour markets remain resilient, with unemployment only marginally rising in some regions, however, remaining close to multi-decade lows.

Volatility in rate markets fell in June, following the resolution of the debt ceiling talks, and the pause in monetary tightening in the US. Bond yields rose slightly in June, while credit spreads slightly decreased during the month.

Over June, Hedged Developed Markets Overseas Shares returned 5.6%, US stocks outperformed emerging markets and other international developed markets. Value and growth stocks delivered similar results in June, although year to date growth has significantly outperformed value. Japan contributed significantly to the outperformance of developed markets, gaining 7.5% in June, as the Bank of Japan continues to stimulate the economy. Emerging Markets Shares (UH) gained 0.9%, held back by weakness in China. Latin America was the standout in emerging markets as the recovery in commodities provides a tailwind for its equities.

Hedged Overseas Government Bonds returned -2.3% over the month, as bond yields generally increased during June. In the US, the 10-year bond yield rose by 16bps. In developed markets outside the US, 10-year yields fell by 3bps in Japan, while yields rose 20bps in the UK, and 13bps in the Eurozone. US inflation expectations, as measured by the 10-year inflation breakeven rate, was unchanged and ended June at 2.2%.

Australian Shares returned 1.7%, underperforming their overseas counterparts in June. Materials (4.6%) and Financials (3.1%) were the strongest sectors, meanwhile Healthcare (-6.4%), and Communication Services (-1.0%) were the largest detractors.

NOTES:

Past performance is not a reliable indicator of future performance

* Investment option available from 1 April 2023 – 28 June 2023 (now closed).

¹**Total Returns** are based on exit prices and allow for deduction of tax and investment fees including indirect costs (but not administration or other fees). Returns greater than one year are shown on an annualised basis.

²**Excess Returns Relative to Benchmark** are calculated by the difference between product performance (before fees and taxes) and the asset-weighted benchmark return. Benchmarks are listed on page 6. Asset weights used are those shown in the Product Disclosure Statement or Investment Policy Statement, as relevant. Returns greater than one year are shown on an annualised basis.

n/a indicates that the investment option was not operating for the full period.
